Certified Fiber Optic Technician Logbook

Use this logbook to record all fiber optic projects you participate in to qualify for advanced levels of certification. Use the following guidelines when recording information.

Fiber Optic Projects recorded in the Installation Logbook

Record the date and location of every project. In the description, record the type of work done (network installation, termination, splicing, testing, restoration, etc.) and a indication of the size of the project (meters/km/miles of cable, number of connectors and/or splices, etc.)

Fiber Optic Training recorded in the Training Logbook

Record the date and location of the training. In the description, record the organization providing the training, instructor's name, length of the class and a description of the training (e.g. terminating with a specific manufacturer's connector or splicing with a specific fusion splicer, network design, testing and troubleshooting, etc.)

If you have any questions regarding this logbook or FOA certification programs, contact The FOA directly.
